PROFILE

Timely and self-directed Computer Science student who is eager to learn new technologies and tackle new and unique software development problems. Experienced in working both individually and in team settings. Passionate in creating new solutions and working with others to further knowledge exchange.

EXPERIENCE

Coop Work Experience Student – Alberta Health Services
January 2022 – September 2022
- Used BluePrism to automate automation opportunities in HR and Finance to generate savings for the organization measured in FTE
- Meet with business groups and subject matter experts to understand the requirements and end-goals of the automation projects and develop plans to translate human processes into automations
- Develop documentation such as Solution Design Documents and Process Flow Diagrams to depict business requirements and digital worker process
- Engage regularly with team members to solve bugs, learn new development methods, and enforce best practices

VOLUNTEER WORK

SKUD Frula
2017 – Current
- Help with various organizational events such as casino fundraisers and festivals
- Assist in the setup and operation of several Serbian Festivals, such as preparing the festival grounds and assisting guests to ensure organizational goals are accomplished
